Drygoods.

New York, December 2.—The usual Monday quiet prevailed in the drygoods market, but there was a fair volume of orders by mail, duplicating and extending previous business. Cotton goods lately placed "at value" shared in the order request as did some of the goods advanced. The upward tendency continues to widen out, though there were few prices changed. The Naumkeag sateens were advanced \$\frac{1}{2}\$\text{c} a yard. The weather was unfavorably warm for the weeden interests, though the effect upon the market was not direct.

The Visible Supply of Grain New York, December 2.—The visible supply of grain on Saturday, December 7, as compiled by the New York Produce Exchange was as follows: Wheat, 88,340,684 bushels: fucrease, 1,855,365 bushels. Corn, 5,729,380 bushels; decrease, 674,385 bushels. Data, 4,899,318 bushels; decrease, 274,385 bushels. Rye, 1,114,932 bushels: decrease, 147,395 bushels. MARKETS BY WIRE.

The Wheat Pit Without Feature, but Prices Fractionally Lower - Pork Tame and the Peeling Easy-Lard Weaker.

CHICAGO-Wheat-There was no special feature in the market to-day. Trade was good early and some large sales were made, but after that a quiet, steady feeling developed and lasted pretty much all through the session. It was rumored that the Northwest had bought considerable wheat again to-day, and shorts were generally disposed to cover, the market closing rather steady. The opening was about A DROP IN HOGS AND RISE IN SHEEP 360% lower for May, and after numerous small fluctuations became easier, declining %c and closed about 1/2 lower than Saturday.

Very little outside news was received, and the wisible supply was about the only influence hav-ing any bearing on the market. There was an ocrease of 1,707,000 bushels. The increases were chiefly at Baltimore, Buffalo, Chicago, Detroit, Duluth, Minneapolis and at St. Louis. No large decreases occurred excepting on the lakes, canals and affoat at New York. Cable advices did not note any special changes.

Corn-There was very little of interest to note in the market, which was quite dull the whole session. Trading was light and limited to local operators. The feeling prevailing was comparatively firm, but no advance of consequence was established. The advance of consequence was established. The speculative market opened at Saturday's closing price, was quiet, fluctuating with %60% range, and final quotations were a shade better than Saturday.

Onto were slow, operators being disposed to

cows iron surrounding counties brought 25/c to 45 per pound, according to condition. Fresh cows were dull and unchanged at a range of 25 to 45 per head. Calves were in light supply and firmly held at 55/c to 45/c per pound.

Joseph & Brown Denies Buying the Schmertz-Beymer Properties.

THEY WILL SOON BE SUBDIVIDED. A Good Authority Says the Pennsylvania

Railroad is Going Slow. AN INTERNATIONAL BANKING SCHEME

The report that Joseph S. Brown, of Allegheny, and formerly of the Wayne Iron Works, was the purchaser of the Schmertz and Beymer properties on Fifth avenue, corner of Craig and Neville streets, is vehemently denied by that gentleman. He said to THE DISPATCH representative vesterday: "I did not purchase the properties in question, nor have I ever had anything to do with them in any way. I do not even know who the purchasers are." This is con-clusive, so far as Mr. Brown is concerned. It was learned incidentally, from a gentleman who has ascertained the intentions of the purchasers, that the ground, comprising a full square, will be subdivided into small lots suitable for business purposes and put on the market next spring. The buildings will probably be allowed to stand.

A gentleman who is in a position to know a good deal of what the Pennsylvania Railroad people are doing in the way of accumulating real estate, said yesterday: "The reports that the Pennsylvania Railroad is buying property on Sixth and Fifth avenues are entirely untrue. The road is not now, nor has it been, doing this. It may have acquired some ground on Cherry alley to give it an outlet to Seventh avenue, but I am disposed to doubt it. As to the other transactions so frequently referred to of late, I can say positively that they exist only in imagination, and the railroad authorities are in no way responsible for their circulation."

A stock specialist, T. W. Pearsall, says: "Speculation is very narrow yet, and I do not think that the big bull movement which we may see next year has started. For the time being, I think discretion will be the better policy to pursue, and the profits, wherever made, should be taken. The market is always here, consequently a little caution in operations may prove to be a very wise move. For a long pull I am a bull; everything warrants the taking of such a position. The vast and general improvement in all mercantile and manufacturing in-dustries is sufficient to make a man look hopefully on the future. From a speculative point of view, however, the market for the time being is simply a traders' one, and in my judg-ment the man who is satisfied for the moment with a point or two turn, on either side, will be the one who will accumulate the largest profits."

It is reported on good authority that there will be an advance in coal rates ordered be-tween this and Christmas. If possible the agents will meet this week, and will then decide to mark up the schedule prices on all sizes and grades of anthracite.

The Financial Chronicle indorses Secretary Windom's stand on the silver question. It says: "His method of treating the subject is certainly admirable. He states that the continued coinage of the silver dollar is the only disturbing element in the otherwise excellent financial condition of the country, and a positive hindrance to any international bimetallic agreement; that the amount of these dollars which can perform any useful function as a circulating medium must soon be reached, and that then the further coinage and storage of

them will become a waste of public money and a burden upon the Treasury."

The Chronicle concludes: "Mr. Windom's plan possesses many attractive features. It would stop the present coinage. It would give us a dollar which was worth a dollar. It would not be concerned to the contractive features. make the Government pay for any loss in the certificates issued instead of making the individual bear the loss. These are all considerations of the control in favor of the measure."

Barker Bros. & Co., of Philadelphia, are reported to be the agents of a syndicate which proposes to start a bank with a capital of 225, 000,000, with agencies in the principal cities of Europe and America. The capital is to be mainly English, and the headquarters in London. The new company is, it is said, almost ready to begin operations. Offices at an annual rental of \$15,000 have been engaged in one of the new buildings in Wall street, and the English manager of the enterprise sailed on Saturday from England for New York.

The bank clearings at 37 cities for 11 months equal \$50,644,997,000, or more than the 12 months' total in 1858, indicating probably \$55, 000,000 as the total for 1899. The increase for 11 months this year over last is 14 per cent, over 1857 8 per cent, and over 1886 \$6,620,650,000,000 or 15 per cent.

Railroad Shares Feel the Effect of the Bad Bank Statement - Chicago Gas Scores an Advance, but

Augur Lets Go. New York, December 2.—The stock market was comparatively dull to-day in both the listed and unlisted stocks, while there was no special animation outside of the coalers and Grangers. London was a seller to a limited extent, and to-morrow being Contango day there, the quotations from the center this morning were rather irregular. This, with the influence of the bank statement of Saturday The stock market was fairly active for Monday, sales aggregating 302 shares, of which 250 were Westinghouse Electric. There were very few changes in the quotations, as compared with Saturday, but those which occurred were with Saturday, but those which occurred were the Union Pacific-Northwestern combination. The market after the first few minutes' traditional traditions of the saturday of the s

the Union Pacific-Northwestern combination. The market after the first few minutes' trading, however, developed a strong tone in general, and the losses of the opening were generally recovered, while New England showed marked strength and rose 1½ per cent followed by other specialties, such as Wheeling and Lake Erie preferred and Chicago Gas, the last named being remarkably strong throughout the day. The Chicago people were liberal buyers of the stock, and it scored one of the handsome advances of the day. The only really weak spots in the market were Sugar, which declined on what locked to be realizing sales, and San Francisco preferred.

A feature of the trading toward noon was the sudden rise in Cotton Oll old certificates, which have become very scarce in the market, and the few remaining shorts in it were treated to a little squeeze, which on very light dealings ran the price up from 3% to 38, though it afterward reacted to 34% and closed at 35.

The pressure upon prices was removed toward 2 P. M., and in the last hour there was a much better tone to the speculation, Western Union coming to the front with a material rise, while among the special ties Manitoba and Texas Land Trust made special amprovement, the latter selling up to 21 against 17 for its last sale last week. The close was active and strong generally at small fractional changes from Saturday's final figures.

Railroad bonds were quiet, the sales reaching only \$1,350,000 with no special amination. The market was stronger than that for stocks and the final changes are in but few instances in the direction of lower prices, though the only special feature of the day was the weakness in the Lonsville, New Abbany and Chicago issues, the first losing 4@115 and the Consolidated, 2\(\text{2} \text{2} \) (00. The important advances were St. Paul 8s, 2 to 128 and Colorado Coal Ists, 2 to 104. A GOOD START.

The Local Money Market Starts Off in Fine Shape.

The week opened in banking circles with a good demand for loans, and rates steady at 687 per cent. Checking and depositing were heavy enough to show that general trade maintains a high degree of prosperity.

Owing to large transactions in grain at Baltimore and cotton at New Orieans, both of these cities led Pittsburg in the volume of exchanges last week. But this advantage is only tem-

Business Notes. THE largest of 40 mortgages recorded yester-day was for \$7,500. Just one-half of the entire number were for purchase money.

THE speculative markets were dull yester day, but the greater ease in money is favorable to a rally. Who will take the lead? THE Philadelphia Company's oil well, in the Rickory field, is plugged pending the erection of tankage. It is believed to be good for 100 barrels an hour at the start. THE Pennsylvania Railroad reports that the

quantity of coal and coke originating on and carried over its lines east of Pittsburg and Erie for the week ending November 30 was 321,383 tons, of which 209,717 tons were coal and 111,673 tons coke. THE proposition to establish a real estate exchange in this city came to the surface again

yesterday. This important matter has hung fire so long, over a year, that something besides talk is needed to inspire confidence that there is more than wind at the bottom of it. THE stockholders of the Yankee Girl Mining Company held their annual meeting in this city yesterday. The report of the treasurer showed that the output of the mine during the showed that the output of the mine during the past year was about \$138,000, of which \$118,667 88 was during the last four months, since the discovery of the rich vein of ore, of which mention was made in the daily press some weeks ago. It was calculated that the output for the next 12 months would be upward of \$350,000. Old directors and officers were re-elected.

WHILE paster of the Canton Church, New Jersey, some years ago, I temporarily lost my voice, and was in consequence unable to preach for nearly a year. Lastspring I began to have all the symptoms of losing it again, I labored with great difficulty, fearing each time I preached would be the last. In July I commenced using Dr. Jayne's Expectorant, at the same time rubbing my throat and chest freely with the liniment. I gargled my throat daily according to the directions given in Dr. Jayne's Almanac, at the same time taking the expectorant regularly. Feeling very much better, I discontinued the use of the gargle and the liniment, but still kept on with the expectorant. This winter I have been more exposed, and preach oftener than for many years past, and yet my voice seems to be growing stronger, and were it not for the requirements of my calling, I firmly believe a percent of the party of the property of the proving stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger, and were it not for the requirements of my calling, I firmly believe a percent was a stronger and the liniment was a stronger quirements of my calling, I firmly believe a permanent cure would be effected by the expectorant.
